

Production Field Operator Program (PFO)

McCoy High School

The PFO Program is for students interested in getting into Alberta's Oil and Gas Industry.

This program is only available for students to begin in Grade 10 and is done online through SAIT. The student must cover the cost of about \$500 per year.

Qualified students will have the opportunity to enroll in SAIT's Oil and Gas Production Field Operations certificate program while attending high school. Students receive CTS credits toward a high school diploma as well as a post-secondary certificate that meets industry standards.

Industry provides a limited number of summer internships to link classroom learning to the work place. Grade 10 students who do not receive summer internships can continue with the PFO classroom modules in Grades 11 and 12 enabling them to achieve the Production Field Operator Certificate from SAIT. Students may also re-apply for an internship in Grade 11 or 12 if unsuccessful in Grade 10. In addition, Grade 10 students who have successfully completed the theory coursework may participate in the EnCana Energy Camp and the pre-internship Safety Training programs.

PFO Program Criteria

- Full time Gr10 student
- 90-95% attendance
- Regularly on time for classes
- Applied or Pure Math 10, English 10-1 or 10-2, Science 10
- Passing ALL courses 60%
- Excellent School Citizen

I am interested in the learning more information about the PFO program (sign name)
